## ABSTRACT

This report is based on information from the 1987 Federal/State Cooperative System for Public Library Data, which was collected in machine-readable format by the U.S. Department of Education's National Center for Education Statistics. Tables present the following data on public libraries in the 19 states that participated in data collection: (1) number of libraries by state, hours of service per week, and population served; (2) number of libraries by state, hours of service per week, and number and type of outlet; (3) number of libraries by size of population served, hours of service per week, and number and type of outlet; (4) number of libraries by state, hours of service per week, and type of staff; and (5) number of libraries by size of population served, hours of service per week, and number and type of staff. Each table also provides statistical totals. Notes on the data collection methodology, related reports, response rate, and definition of terms are included. States participating in the voluntary program were Colorado, Florida, Idaho, Indiana, Iowa, Minnesota, Montana, New Hampshire, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Texas, Utah, Washington, and Wyoming. **Public Libraries in Nineteen States: 1987  
Number of Libraries, Library Outlets, and Staff**

This report is based on information from the 1987 Federal/State Cooperative System for Public Library Data (FSCS), collected in machine readable format by the U. S. Department of Education's National Center for Education Statistics(NCES). FSCS is a cooperative system that allows States to submit public library data to NCES on a voluntary basis. In 1987, 19 States participated in the first cycle of data collection. The tables summarize information about the public libraries as supplied to NCES by the State library agency.

**TABLES****PAGE**

1. Number of public libraries in 19 States by State, hours of service per week, and population served: 1987	4
2. Number of public libraries in 19 States by State, hours of service per week, and number and type of outlet: 1987	11
2a. Number of public libraries in 19 States by size of population served, hours of service per week, and number and type of outlet: 1987	15
3. Number of public libraries in 19 States by State, hours of service per week, and number and type of staff: 1987	18
3a. Number of public libraries in 19 States by size of population served, hours of service per week, and number and type of staff: 1987	22

Table 1.--Number of public libraries in 19 States by State, hours of service per week, and population served: 1987

State	Hours of service per week	Number of libraries	Total population served	Less than 1,000	1,000 to 2,499	2,500 to 4,999	5,000 to 9,999	10,000 to 24,999	25,000 to 49,999	50,000 to 99,999	100,000 to 249,999	250,000 to 499,999	500,000 to 1,000,000	Nonresponse

## Technical Notes

### Methodology

The State library agencies were given a format for submitting 41 data elements for all of the libraries in their States. The format includes specifications for 34 basic data items and 7 library identification items. These data could be submitted on a diskette using Lotus 1-2-3 or dBASE, or on magnetic tape.

The States submitted data for each public library in the State. These data were for the latest 12 months available for each library in July 1988. This could have been calendar year 1987 or whatever fiscal year was used by the State in its own data collection.

Nineteen States responded with machine-readable data during July 1988. It is expected that eventually all 50 States and the District of Columbia will respond to this annual survey in the coming years.

Because adjacent libraries may have overlapping service areas where several libraries count the same population, that is, a county library system and a city library system within that county would each serve the city population, the computed sum for the State population exceeds the actual population of the State. Each State library agency was accorded the opportunity to provide an unduplicated count at the State level for the total population served to replace the sum of the individual library statistics. Fifteen of the 19 States provided this data.

### Related Information

This report is one of seven E. D. Tabs planned for the 1987 Public Library data. The other six cover the following topics and include the tables indicated.

- Income (Tables 4-6)
- Expenditures (Tables 7-9)
- Capital Outlay (Tables 10-11)
- Library Collection (Tables 12-13)
- Hours per week (Tables 14-15)
- Library services (Tables 16-17)

A data tape including all 1987 data is also available.

### Response Rates

The 19 States that responded supplied data for all data items for all libraries, wherever possible. The one exception to this was Pennsylvania which inadvertently supplied data for only 117 of its 483 libraries or 24.2 percent.

## Survey Definitions

Population of legal service area: The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives income plus any areas served under contract for which the library is the primary service provider. The determination of this population figure shall be the responsibility of the State library agency.

Public service hours per week: Reflect the schedule followed during the majority of the weeks of the year, ignoring seasonal variations.

## Service outlets

- **Total number of outlets:** The sum of central libraries, branch libraries, bookmobiles, and other service outlets.
- **Central library:** The single unit library or the unit where the principal collections are kept and handled. Also called "main library". Some county, multicounty and regional library systems may not have a central library. Some systems may have an administrative center which is separate from the principal collections and is not open to the public. This type of building should not be reported.
- **Branch libraries:** Auxiliary units which have all of the following: (1) separate quarters, (2) a permanent basic collection of books, (3) a permanent paid staff, and (4) a regular schedule for opening to the public. They are, however, administered from a central unit. Regional or divisional centers should be counted as branches.
- **Bookmobiles:** Trucks or vans especially equipped to carry books and other library materials and serve as traveling branch libraries. Vehicles in use are counted, not stops.
- **Other service outlets:** Include collections in nursing homes, jails, etc.

## Employees, full-time-equivalents (FTE)

Figures as of the last day of the fiscal year, including unfilled positions if a search is currently underway.

- **Full-time-equivalent employees:** Forty hours per week is the measure of full-time employment for the FSCS. To compute full-time-equivalents of employees in any category, take the number of hours worked per week by all employees in that category and divide it by 40.
- **Librarian:** Person who does work that requires professional training and skill in the theoretical or scientific aspect of library work, or both, as distinct from its mechanical or clerical aspect. The usual educational requirement is a master's degree (or its historical antecedent) from a library education program approved by the American Library Association (ALA).

- **ALA-MLS:** Librarians with a master of library science degree from programs accredited by the ALA. This category excludes all other librarians.
- **All other paid employees:** Includes all other employees paid by the reporting unit budget except plant operation, security, and maintenance staff.
- **Total paid employees:** Sum of librarians and all other paid employees.

**Nonresponse:** The number of libraries that did not respond to this data item.
